

CATCH THE COMET OF THE SEASON

NAU CAMPUS OBSERVATORY OPEN FOR PUBLIC OBSERVING

Observe Comet Lulin With the Lutz Telescope

The brightest comet of the season makes its closest approach to the Earth in late February. The NAU Astronomy Club will host public viewing of comet Lulin with the new Lutz telescope on the NAU campus. The superb optical quality of the telescope and the dark skies of Flagstaff will make for an excellent opportunity to view this sublimating giant snowball from the outer Solar System whose kind may have brought both life and destruction to the Earth.

When: Friday, February, 27, 2009, 7:30 - 10:00 p.m

Where: NAU Campus Observatory, Bld 47, On South San Francisco Street, north of Sky Dome.

For more information call: 523-7170.
